The University of Georgia College of Agricultural and Environmental Sciences seeks candidates for the position of professor and head of the Department of Horticulture. This is a 12-month, tenure-track position. The successful candidate will be expected to administer and coordinate high-quality teaching, research and Extension programs while playing a proactive role in increasing extramural support for these programs. Specific responsibilities include faculty recruitment, management and leadership; student recruitment; faculty performance evaluations; the coordination of promotion and tenure procedures; program planning and implementation; budget management; and management of physical facilities, including both laboratory and field facilities. The individual will also work effectively with faculty, representing the department among university and agency administrators, industry clientele, and state and federal personnel. The department head (or their designee) has oversight over field units supporting research, teaching and outreach.

Minimum Qualifications
- A doctorate in horticulture, plant biology or related biological sciences, with demonstrated excellence in teaching, research and/or extension.
- The successful applicant must qualify for the rank of professor.

Preferred Qualifications
- Higher education administrative experience.
- Evidence of creative and innovative leadership.
- Demonstrated success in procuring extramural funding.
- Ability to work effectively with faculty, staff and students.
- A demonstrated commitment to diversity.

Applications
Applications received by February 1, 2018, will be assured full consideration; however, screening will continue until the position is filled. Applicants should submit documentation electronically at facultyjobs.uga.edu/postings/3253.

To apply, submit: (1) a formal letter stating the applicant’s qualifications for the position and a statement of leadership philosophy; (2) a current resume that includes a list of publications; and (3) a list of four references with contact information including email addresses. References will not be contacted without further communication with the applicant. Salary is commensurate with qualifications, and a comprehensive benefits package is included.

Nominations are encouraged and accepted. All nominations and inquiries should be directed to Search Committee Chair and Department of Entomology Head Kris Braman at kbraman@uga.edu or (706) 542-2816.

The University of Georgia is an Equal Opportunity/Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, sexual orientation, gender identity, disability, or protected veteran status.
The University of Georgia
The legendary hospitality of the South served up in a city with classic culture offers University of Georgia students a welcoming environment for learning. Universitywide enrollment for fall 2016 totaled more than 36,000 students. UGA’s main campus in Athens, Georgia, includes 465 buildings on 762 acres. Statewide, the university has more than 39,000 acres in 31 Georgia counties devoted to education, research and outreach. Founded in 1785, UGA is the nation’s first state-chartered university.

The College of Agricultural and Environmental Sciences
The study of agriculture and the environment has been an important part of the University of Georgia since its earliest years. The university’s founder, Abraham Baldwin, envisioned a college garden capable of supplying food for the students and the community. What is now the College of Agricultural and Environmental Sciences was founded in 1859. In 1918, it became the university’s first college to accept women.

One of 17 schools and colleges that make up UGA, CAES provides students with the community feel of a small college within the larger university. Small, upper-division classes enable students to easily connect with professors. Students study plants, animals, business, communication, teaching, food science and the environment. The college focuses on providing a safe food supply, clean environment and better lives for all.

The college has classrooms, laboratories and facilities on UGA campuses in Athens, Griffin and Tifton, Georgia. In addition, CAES has research and education facilities throughout Georgia, in Attapulgus, Blairsville, Calhoun, Camilla, Eatonton, Lyons, Midville, Plains, Savannah and Watkinsville. The college is also represented across the state by local UGA Cooperative Extension offices and 4-H centers in Dahlonega, Eatonton, Hampton, Tybee Island and Camp Jekyll on Jekyll Island.
