On April 16-18, 2018, The Hot Weather Management Workshop will be conducted at the Oconee County Civic Center in Watkinsville, Georgia, a few miles from the University of Georgia.

This intensive training program has been specifically designed for those who want to learn more about the design and management of modern poultry houses. The workshop consists of lectures as well as hands on group exercises designed to help attendees gain a firm understanding of the principles behind hot weather poultry house management.

**Workshop Topics Include:**
- Feed and heat stress
- Bird cooling methods
- Basic tunnel ventilation system design
- Factors affecting air speed in tunnel houses
- Factors affecting air speed uniformity in tunnel houses
- Tunnel ventilation and static pressure
- Static pressure in tunnel houses
- Tunnel fan selection
- Hot weather bird health issues
- Evaporative cooling basics
- Solar power for poultry farms
- Answers to a ten common questions about evaporative cooling
- Fan & evaporative cooling system maintenance
- Hot weather management tips
- Evaluating tunnel ventilation system performance
- Basic tunnel ventilation system operation

**Webinar Information:**
A webinar has been established for industry personnel that wish to stream the workshop from a distance. During the workshop, you will be able to hear and see the presenters, participate with questions, and see any visuals that are presented.
