Abstract
The Peanut Information Network System (PINS) is a Web-based (www.worldpeanutinfo.com), USAID Peanut-Collaborative Research Support Program (CRSP) funded, system. The purpose of PINS is to provide information on peanut-related publications and training materials. It also provides information on worldwide peanut research, processor and consumer values, peanut meetings and workshops, and other related news and useful links.

Organizations, Research, Publications, and Training Materials on PINS
Organizations Involved in the Advocacy and Education of Peanuts are Found in the "Organizations and Research Labs" Section on the Site

Research Labs
Lab groups involved in peanut research can be found on PINS

Trainings Materials
The following training materials can be found on PINS:
- Annual Georgia Peanut Tour and Hot Topics on Peanuts
- ICRISAT training materials
- Georgia Peanut Farm Show Seed Seminar
- HACCP for the peanut industry
- Peanut Leadership Academy

Publications
PINS has a large selection of conference abstracts, peanut journal article abstracts, as well as links to magazines, country reports and research publications. In addition, Peanut-CRSP research reports can be found on PINS

Values by Group

Producer Values
This section contains information useful for processing peanuts. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Research Practices
This section contains information about how peanuts are produced in several regions around the world. The section includes articles, as well as a short summary and keywords provided with each article.

Agronomy and Fertilization
This section provides links to documents that discuss various issues dealing with peanut agronomy and fertilization. The section includes articles, as well as a short summary and keywords provided with each article.

Diseases
This section provides links to documents that discuss various issues dealing with peanut diseases. The section includes articles, as well as a short summary and keywords provided with each article.

Processor Values
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Aflatoxin Management
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Processing and Sensory Quality
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Biofuel
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Postharvest Handling and Storage
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Products and Value Addition
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Consumer Values
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Nutrition
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Aflatoxin and Its Health Risks
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Food Allergy Information
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.

Conclusions
This section contains information useful for processing peanuts for sale. Information is provided in the areas of production, marketing, and pricing. The section includes information on crop insurance, producer organizations, and marketing the peanut.
