

## ABOUT THE CENTER

The Georgia Structural Pest Control Training

Center was dedicated in 1998 following a cooperative agreement between the University of Georgia and the Georgia Department of Agriculture. The 3,000 square foot facility was built to train and educate termite control professionals, regulatory inspectors, and cooperative extension service personnel on the proper treatment and inspection of homes for subterranean termites. Educational programming addresses the critical and changing needs of the termite control industry in Georgia and the Southeastern U.S. via classroom instruction and field demonstration.

GRIFFIN CAMPUS

# The Structural Pest Control Training Program

This program offers instruction through classroom lecture and discussion, onsite demonstrations, and field activities on such topics as:

- Termite biology and inspecting for termites,
- Construction methods and types,
- Rules and regulations governing termite control in Georgia,
- New developments in termiticides,
- Formosan termites in Georgia,
- Application equipment, calibration, and demonstrations,
- Safety considerations, including protective clothing, electrical precautions, back siphoning, and chemical spills,
- Environmental concerns, including runoff and disposal of rinsate and containers,
- Void and sub-slab treatment demonstrations, including foaming

Completion of the one and one-half day program carries eleven hours of credit towards **Certification** and six hours of credit towards **Registration** in the category of Wood Destroying Organisms.

The registration fee for the program includes instructional materials, uniform patches, a Certificate of Completion, refreshments, and lunch. For more information, including upcoming workshop dates, contact the Training Center at **770-228-7220** or online at [www.griffin.uga.edu/termite](http://www.griffin.uga.edu/termite).

*"Very interesting. I expect to send each WDO tech here. Thanks for the hard work."*

*"Worth every penny, enjoyed very much. Very good information."*

*"Fantastic group of informed professionals. Every WDO tech in any company should be required to attend."*
