

Become a Master Composter

NEW Master Composter Program

If you enjoy working with people, digging in the dirt and talking “trash”, we want you to become a volunteer *Master Composter* with the Athens-Clarke County Master Composting Program! Become a home composting expert and teach your family, friends, neighbors, and fellow community members, “How to Compost”.

Master Composters are an elite group of volunteers who have undergone an extensive training class in all aspects of the composting process, and then use that information to teach others how to turn their organic material into a beneficial soil amendment.

Master Composter Program Information

Expectations:

1. Complete the training course and field trips - (8 classes and 2 field trips)
2. Complete class project
3. Volunteer a minimum of 40 hours back to the program

Typical Volunteer Duties:

1. Teaching or assisting staff with compost workshops.
2. Staffing composting information booths at various public education and outreach events.
3. Giving lectures on composting to various civic, community, and garden groups.
4. Giving hands-on presentations or assisting staff with school compost programs.
