

## **Information to Explain and Promote Georgia 4-H**

As you meet with County Commissioners, School Board Officials and others to seek support and funding for 4-H programs, these are a few items that you can use for reference. Of course, this is just a few of many resources and often your best tool to garner support for our youth programs is your heartfelt, sincere sharing of personal observations and examples of the 4-H program at work. Productive, articulate, civic-minded contributing young adults who are the product of our programs are our best advertisement! Utilize those resources in your county to advocate for you as well.
