Guidelines for Use

Units should be turned off when not in use. Avoid auto-answer.

Call or email the scheduler for each site prior to the conference or call. Schedulers should make sure the unit is on and accept the call when it comes in.

The host site should call all remote sites.

Avoid using video conferencing if a simple phone call would suffice. **Videoconferences cause strain on the networks at each campus. DO NOT 'CASCADE' CONFERENCES!**

All frequently called numbers should be stored in the unit's address book.

For other UGA videoconferencing systems, see the list at:

<http://www.uga.edu/netinfo/vconf/advertised.uga.vc.systems.html>
