

Youth Engagement in Agriculture

Explore Scotland and practice your education training in the same trip.

Through this program, University of Georgia students will expand their worldviews by leading elementary school lessons in agriculture and implementing service learning projects in Dumfries, Scotland.

This two-week adventure addresses student engagement in the agricultural and environmental sciences. Through a partnership with Dumfries schools and University of Glasgow Dumfries campus faculty and students, program participants will work together to engage elementary students in agricultural lessons.

UGA students will also travel to London, Dumfries and the Scottish Highlands to implement service-learning projects and participate in academic and cultural events. They will design and introduce agricultural and environmental lessons and teaching resources at Troqueer Primary School, ultimately sharing their experiences through print or digital media. Students will also have opportunities to immerse themselves in Scottish food, entertainment and culture.

Projected travel dates:

Early June

Estimated cost:

\$2,900 + UGA in-state tuition and fees + international airfare

global.uga.edu/scholarships

UGA academic credit:
