OFFICE OF RESEARCH

Researchers in the University of Georgia's College of Agricultural and Environmental Sciences (CAES) are working to engineer a better tomorrow.

Faculty and staff with the CAES Office of Research are committed to discovering, innovating and delivering the science required to feed and fuel the world. Throughout our college, some of the most respected researchers in the world are working in our labs and teaching in our classrooms.

UNIVERSITY OF
GEORGIA

College of Agricultural &
Environmental Sciences

OUR IMPACT

At UGA, we deliver a **\$144.4 million** boost to Georgia's economy. Agricultural and environmental sciences-focused research keeps Georgia on the leading edge of these industries. This research is foundational in the land-grant university mission of education for everyone, creation of science-based methods, and expert Extension outreach to help ensure that research-based agriculture is practiced in America.

To keep Georgia's agricultural industry on the leading edge of innovation CAES pursues research into the most pressing issues facing the planet, develops enhanced curriculum to teach in the classroom and delivers the latest science-based innovations to the state through Extension outreach.

CAES is harnessing advances in urban agriculture, animal science, regenerative bioscience, plant science, food science, environmental resource management, sustainability and conservation, health and wellness, and more.

INTERNATIONAL INFLUENCE

We conduct research across Georgia and around the world.

« Learn more about our work and partnerships locally and globally.

In every place where CAES has a presence, we seek to ensure the future of agriculture and the environment, knowing that the health of our agricultural and environmental systems equates to the health of our lives, our communities and the world.
