International Agribusiness in Diversified Livestock and Grain Production

Spend your spring break in the field studying international agribusiness, diversified livestock and grain production in the South American country of Uruguay.

During spring semester, an online class will provide you with knowledge and background information about Uruguay. Then, over spring break, you’ll travel to Uruguay to study livestock and grain production systems in detail through lessons from industry experts at the National Institute of Agricultural Research.

You will travel to Uruguay’s capital, Montevideo, as well as Punta del Este, Treinta y Tres and surrounding cities. You will visit a pasture-based dairy, grain-finished beef operations, grass-fed and organic beef and lamb farms, grain and oilseed farms, local farmers markets, and a beef packing plant. You will also have time to tour the country and relax at the beach.

“My study abroad experience allowed me to see agriculture industry interactions on a global scale. While in Uruguay, I learned how sustainable practices in beef and rice production feed a growing population, and I experienced a new culture, developed friendships and created some amazing memories!” – Ashley Smith

Projected travel dates:
Spring break

Estimated cost:
$1,200 + UGA in-state tuition and fees + international airfare
global.uga.edu/scholarships

UGA academic credit:
AAEC/ADSC 3911, AAEC 4990E (3 hours)
Fulfills experiential learning requirement
